

ESPADA

Personnel Evacuation Services

In today's volatile global climate, a once-stable environment can quickly deteriorate against the forces of nature and man. During such times, corporate executives, VIPs, and workers in countries around the world could find themselves in harm's way. ESPADA can bring them home safely and quickly.

ESPADA Logistics & Security Group is an established international company with an outstanding reputation in the industry. We can readily meet your immediate and rapidly changing requirements with any number of proven capabilities, under any conditions, permissive or not, established or austere. ESPADA is the first call for effective and timely solutions, underscored by confidentiality and discretion.

Maritime Extraction - ESPADA's support of coastal operations does not end with the delivery of a ferry, passenger charter, or any other response vessel, scaled to the number of people needing safe transit. In addition to enabling secure points of embarkation, we can arrange manifest control, even when moving citizens of differing nationalities, with varying documentation.

Air Evacuation - ESPADA can provide fixed or rotary-wing aircraft, capable of any desired payload, to airlift your personnel from approved airfields, or even grid coordinates on a map. Our team members will provide the right balance of security and crowd control, thereby facilitating smooth documentation checks, manifesting, baggage handling and passenger embarkation.

Surface Movement - On occasions when suitable water ports and airfields are not available or distances are too great for time-sensitive operations, ground transportation to pre-arranged locations can be provided. These scalable solutions, along with our armed security, can ensure unimpeded passage to coordinated safe zones or to the borders of welcoming countries.

Medical - ESPADA employs a group of highly-skilled and well-equipped medics. An integral part of every team we dispatch, these individuals can quickly assess the immediate medical needs of all evacuees and prioritizing care through effective triage. Once completed, patients are then stabilized to allow for safe & comfortable transport to a safe location.

Planning - ESPADA's experienced cadre of logistics and operations planners will work every detail, at every step, with your representatives. Prudent planning is absolutely critical to successful operations, and our staff will address everything from weapons clearance issues to repatriation considerations, freeing you up to focus on the one thing that matters most . . . your people.
